

LISTEN TO WHAT YOU'VE BEEN MISSING

Introducing the TuneAudio Pulse Active Horn Subwoofer.

THE PULSE

ACTIVE HORN SUBWOOFER.

PULSE active horn subwoofer is designed to reproduce the first octaves of the acoustic spectrum in large rooms without any limitation. The horn, tuned to the lower acoustic limit, fires to the floor and loads a 15" woofer. It's full length is braced to avoid any colorations and it's build of grade A Baltic birch plywood. The embedded -more than adequate- 100W digital amplifier will reproduce a max spl of about 130db depending on placement.
